WinSwag Privacy Policy

WinSwag (the "application") is a productivity tool developed by Sven Vinkemeier (the "developer"). Its purpose is for a software developer (the "user") to interactively explore REST APIs described by Swagger specifications.

What information is collected and why?

WinSwag collects anonymous telemetry data, including, but not limited to, crash reports, the operating system version and application usage statistics. This helps the developer to identify potential issues in the application and improve its quality. Information collection can be stopped only by uninstalling the application.

Note about third parties

WinSwag allows the user to communicate with third party services. The developer is not responsible and shall not be liable for any issues, damages or data leakage caused by the user providing information to these services. The privacy policies and terms of use of those services apply.

Contact

If you have any questions regarding privacy while using WinSwag, or have questions about the practices, please contact the developer via email at apps.svenvinkemeier@live.de.

Please report bugs and feature requests to: https://github.com/SvenEV/WinSwag.
